BHIMARAJU SRI RAMAN

+91 9671956655; **Email :** ramandare12@gmail.com

PROFESSIONAL SUMMARY

- Aspiring Data Analyst and AI/ML enthusiast with a strong technical foundation in Automation, Artificial Intelligence, and Machine Learning. Possessing 2.5 years of industrial experience in pharmaceutical manufacturing at Dr. Reddy's Laboratories, along with hands-on knowledge of Python, SQL, Data Analytics, and Machine Learning fundamentals. Seeking an opportunity to apply analytical, technical, and problem-solving skills in Data Analytics or IT roles while continuously learning and contributing to organizational growth.

TECHNICAL SKILLS

PROGRAMMING & ANALYTICS

- Python Programming (Basics to Intermediate)
- SQL & DBMS
- Data Analytics Fundamentals
- Machine Learning Fundamentals
- Pandas, NumPy, Scikit-learn
- MySQL
- Jupyter Notebook

PROFESSIONAL SKILLS

- Problem Solving
- Team Collaboration
- Analytical Thinking
- Communication Skills

INDUSTRIAL SKILLS

- Machine Operation & Production Monitoring
- cGMP & SOP Compliance
- Pharmaceutical Manufacturing Process
- Equipment Handling & Safety Procedures

CERTIFICATIONS

- AI & Machine Learning Coursework
- Python & SQL Learning Modules

EDUCATION & TRAINING

- B.Tech – Artificial Intelligence & Machine Learning from DRK Institute of Science & Technology; CGPA: 6.5
- Diploma – Automation & Robotic Engineering from Central Institute Of Tools Designing; CGPA: 7.0

Professional Experience:

Dr. Reddy's Laboratories **From - To**

Machine Operator

Responsibilies:

- Operating granulation and production machines in pharmaceutical manufacturing.
- Following cGMP and SOP guidelines during production activities.
- Monitoring machine performance and maintaining production quality.
- Performing basic troubleshooting and ensuring smooth operations.
- Maintaining cleanliness and safety standards in the production area.
- Recording batch and production details accurately.

Academic Projects

Techometer Using 8051 Microcontroller

- Developed a speed measurement system using 8051 microcontroller technology for monitoring rotational speed.

Prediction of Loan Approval Using Machine Learning

- Built a machine learning mini-project to predict loan approval status using classification algorithms and data preprocessing techniques.

Black & White AI Image and Video Colorization System

- Developed an AI-based system capable of converting black-and-white images and videos into colorized outputs using machine learning concepts.

Strengths

- Quick Learner
- Adaptability
- Time Management
- Attention to Detail
- Strong Work Ethics
